H&L's Caterpillar Style HL-8110 Scarifiers are produced from aircraft quality Chrom-Moly-Nickel grade alloy steels to enhance shank **DURABILITY and TOUGHNESS!**

H&L Tooth Company History since 1931:

This small Series Caterpillar Style scarifier shank HL-8110 was reversed engineered and introduced as a Caterpillar replacement by the Hi-Production Forge Company in 1983.

Hi-Pro was a Division of the H&L Tooth Company in Montebello, California during the 1970's and 80s. This shank uses H&L's forged HL-6Y-5230 slip-on style Tooth design.

Today, H&L continues to produce the complete HL-8110 scarifier and tooth system. All H&L forged teeth are made in the USA! H&L offers a cast CX-6Y-5230 tooth also.
